Along the way, it discusses the importance of qualitative measures such as governance, which go well beyond generally accepted accounting principles and international financial reporting standards, and addresses a variety of special situations in the life cycle of businesses, including initial public offerings and bankruptcies. Engaging and informative, *Corporate Valuation for Portfolio Investment* also contains formulas, checklists, and models that the authors, or other experts, have found useful in making equity investments.” Purchase from [Amazon](#)

The New Global Investors (Capstone Publishing Limited, 2001). *The New Global Investors* explains that pension funds have a fiduciary responsibility to provide retirement security for plan participants, and plan trustees are legally responsible to invest in their beneficiaries' best interest. Plan sponsors therefore have a duty to demand that managements of the companies in their portfolios are not only working effectively to maximize profits today, but also acting in a socially and environmentally responsible manner to ensure sustainable value for the future.
